Latest update:

Fitch decided on **12 May 2026** to upgrade KBC Bank and KBC IFIMA's long- and short-term senior unsecured debt ratings to AA- (from A+) and F1+ (from F1), respectively.

The upgrades were the result of the updated Bank Rating Criteria by Fitch, that led to a revised view of increased creditor protection from parent KBC Group's very large resolution debt buffer.

Moody's decided on **21 April 2026** to downgrade KBC IFIMA's senior unsecured debt rating to A2 (from A1), triggered by the new CMDI legislation approved at European level leading to full depositor preference.

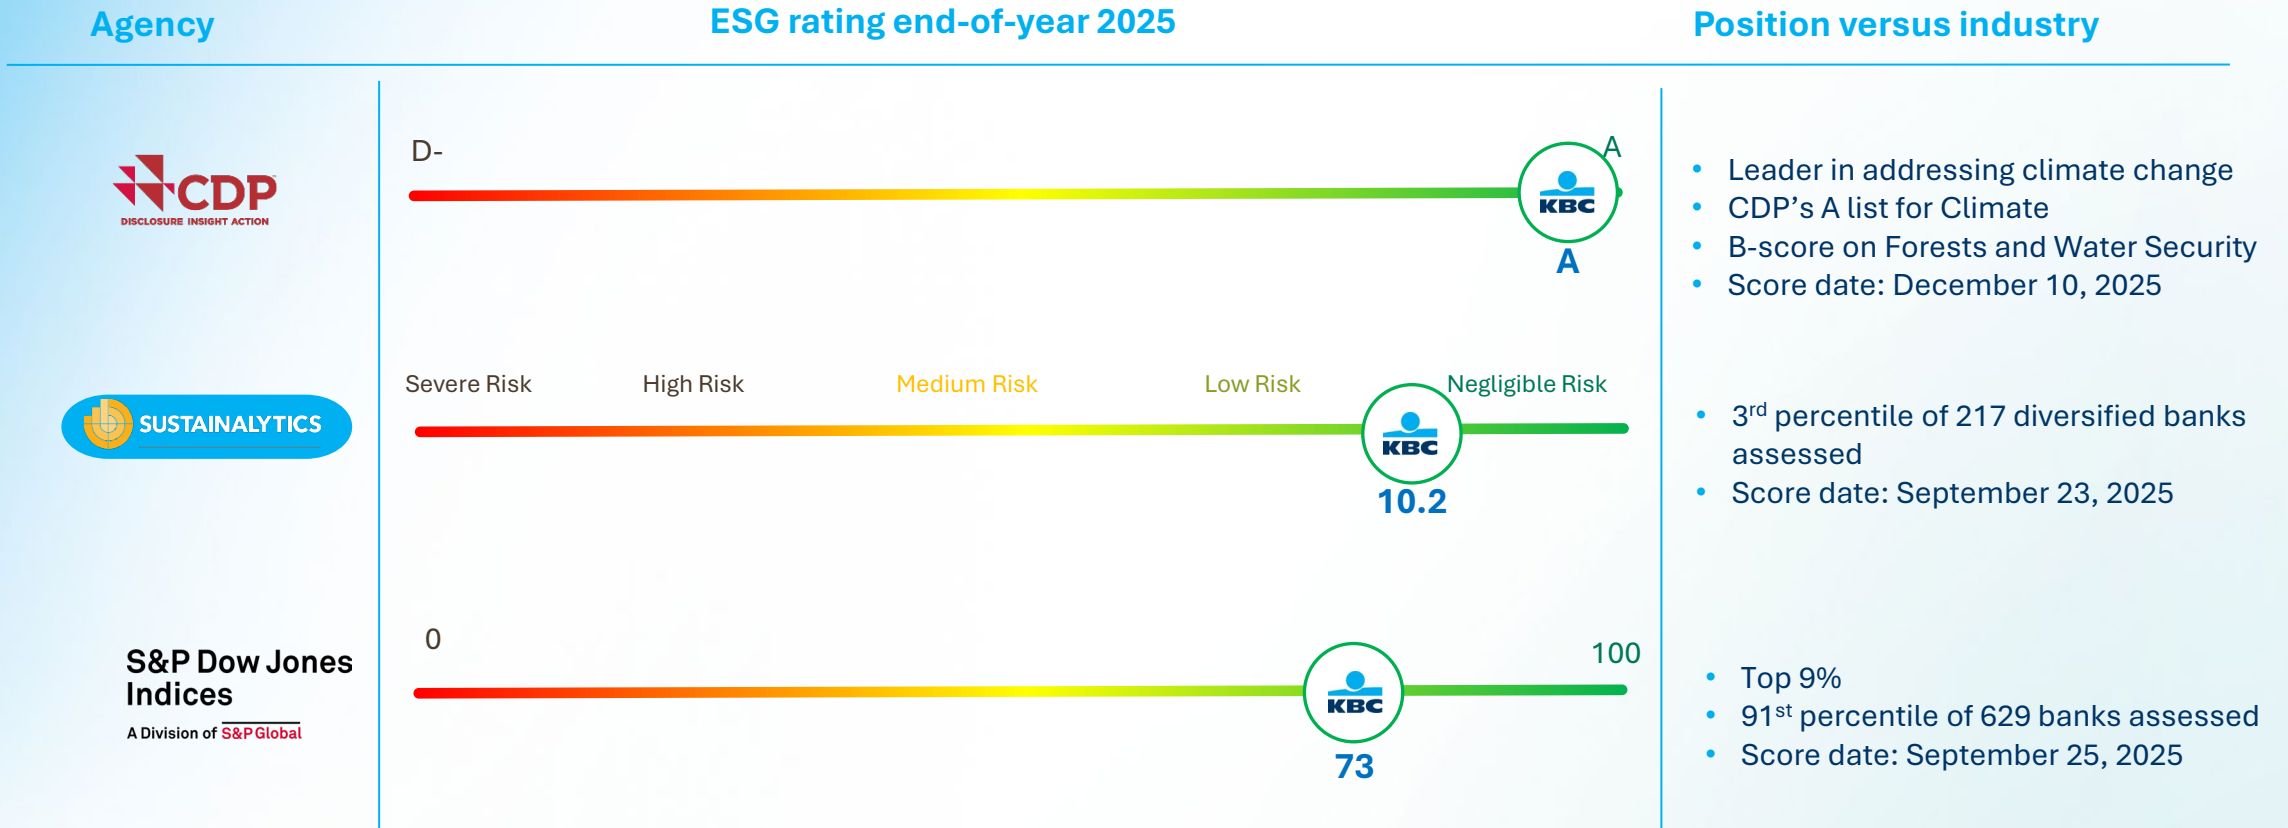

S&P decided on **21 November 2025** to upgrade KBC Group's subordinate debt rating (Tier 2) to BBB+ (from BBB) and the AT1-instruments to BBB- (from BB+).

The upgrades were the result of adjustments to the hybrid capital methodology of S&P (main change for KBC Group: for banks issuing capital instruments from HoldCo that are resolution entities, S&P no longer sees them as facing higher default risks than equivalent OpCo debt).

S&P decided on **29 November 2024** to revise the outlook to positive.

The positive outlook reflects S&P views that KBC Group's strong franchise, robust risk management, sound liquidity and funding metrics, and its advancement in building digital infrastructure should enable the group to perform well in different economic conditions and achieve sustainable results

Strong growth of net interest income

NET INTEREST INCOME

in m EUR

- NII increased by 4% q-o-q and by 18% y-o-y (+2% q-o-q and +15% y-o-y excluding the acquisitions of 365.bank and Business Lease)
- +4% q-o-q was driven primarily by:
 - Higher commercial transformation result (due to continued increasing reinvestment yields, higher benchmarked deposit volumes and lower external rates)
 - Slightly higher lending income, as organic loan volume growth and the acquisition of 365.bank was largely offset by lower loan margins in most core markets and a 10m negative one-off in Hungary (loan interest subsidy correction)
 - Higher ALM result
 - Higher NII on term deposits
 - Higher dealing room NII
 - Lower costs on the minimum required reserves held with the central banks partly offset by:
 - Lower number of days (-17m EUR q-o-q)
 - Lower NII on inflation-linked bonds (-17m EUR q-o-q, from +5m EUR in 4Q25 to -12m EUR in 1Q26)
 - Higher wholesale funding costs
- +18% y-o-y was driven primarily by significantly higher commercial transformation result, higher lending income, higher ALM result, higher dealing room NII, lower costs on the minimum required reserves held with the central banks and lower subordination costs

NET INTEREST MARGIN*

in %, calculated excluding dealing room, ALM FX swaps & repos

- Rose by 6 bps q-o-q and by 12 bps y-o-y for the reasons mentioned on net interest income and an increase in the interest-bearing assets (denominator), both q-o-q and y-o-y
- Excluding 365.bank and Business Lease, NIM amounted to 2.14% (+3 bps q-o-q and +9 bps y-o-y)

* Non-annualised ** Loans to customers, excluding reverse repos

*** Customer deposits, excluding debt certificates and repos, but including customer savings certificates.

Excluding the volatility in the foreign branches of KBC Bank (included in BE BU), core customer deposits stabilised q-o-q and rose by 3% y-o-y

Growth figures are excluding FX, consolidation adjustments and reclassifications.

Inflow of core customer money

CUSTOMER MONEY DYNAMIC OVER 1Q26

in bn EUR

- **1Q26** saw an inflow of core customer money of **+5.4bn EUR** (+4.8bn EUR incl. FX impact)

Slightly higher net fee and commission income, despite geopolitical turmoil

Strong net inflows in direct client money in the first quarter

NET FEE & COMMISSION INCOME

in m EUR

- **Up by 1% q-o-q and by 6% y-o-y (-2% q-o-q and +3% y-o-y excluding the acquisitions of 365.bank and Business Lease)**
- The first-time consolidation impact of 365.bank and BL (+18m EUR) was largely offset by a +15m EUR year-end effect in 4Q25 (linked to the performance of CZ pension fund)
- +1% q-o-q was driven primarily by:
 - Net F&C income from Asset Management Services increased by 1% q-o-q due mainly to higher entry fees
 - Net F&C income from banking services rose by 1% q-o-q due chiefly to lower distribution commissions paid for banking products, lower client incentives, higher fees from credit files & bank guarantees and higher fees from retail trading platforms (Bolero and Patria), partly offset by lower network income (mainly negative impact of EUR adoption in Bulgaria), lower securities-related fees and higher SRT coupon cost
 - Lower distribution fees linked to insurance
- +6% y-o-y was mainly the result of:
 - Net F&C income from Asset Management Services rose by 11% y-o-y due mainly to higher management fees
 - Net F&C income from banking services decreased by 1% y-o-y due mainly to the SRT coupon cost, higher distribution commissions paid for banking products and lower network income, partly offset by higher fees from payment services and higher securities-related fees

ASSETS UNDER MANAGEMENT

in bn EUR

- **Decreased by 1% q-o-q** as net inflows (+1%) were more than offset by negative market performance (-2%)
- **Increased by 8% y-o-y** due to net inflows (+4%) and positive market performance (+4%)
- The mutual fund business has seen strong net inflows this quarter, both in higher-margin direct client money (**1.6bn EUR in 1Q26** versus 0.7bn EUR in 4Q25 and 2.0bn in 1Q25) as well as in lower-margin assets

Non-life sales up y-o-y, excellent life sales (up q-o-q and y-o-y)

NON-LIFE SALES

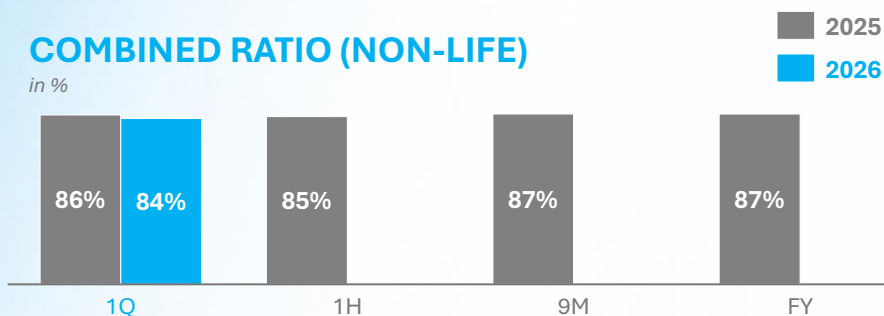

in m EUR

- **Up by 7% y-o-y**, with growth in all countries and all main classes, due to a combination of volume and tariff increases

COMBINED RATIO (NON-LIFE)

in %

- **Non-life combined ratio for 1Q26 amounted to an excellent 84%** (86% in 1Q25). This is mainly the result of:
 - 9% y-o-y higher insurance revenues before reinsurance
 - 3% y-o-y higher insurance service expenses before reinsurance
 - Lower net result from reinsurance contracts held (down by 18m EUR y-o-y)

LIFE SALES

in m EUR

- Increased by 9% q-o-q due entirely to higher sales of unit-linked products (as the result of a successful launch of structured emissions and commercial actions in Belgium on one hand, and a single-premium campaign in Bulgaria on the other hand), partly offset by lower sales of guaranteed-interest products (due chiefly to traditionally higher volumes in tax-incentivized pension savings products in Belgium in 4Q25) as well as lower sales of hybrid products
- Increased by 15% y-o-y due to higher sales of guaranteed-interest products and unit-linked products, partly offset by slightly lower sales of hybrid products
- Sales of guaranteed-interest products and unit-linked products accounted for 36% and 58% of total life insurance sales in 1Q26 respectively, with hybrid products (mainly in Belgium and the Czech Republic) accounting for the remainder

FIFV & IFIE result sharply down q-o-q and net other income above the normal run rate

FIFV & IFIE

in m EUR

	1Q25	2Q25	3Q25	4Q25	1Q26
Dealing room	77	60	53	56	30
MVA/CVA/FVA	-1	0	5	-6	-1
IFIE – mainly interest accretion	-67	-67	-69	-72	-76
M2M ALM derivatives and other	-55	-27	-51	1	-71
FIFV & IFIE	-45	-34	-62	-22	-118

NET OTHER INCOME

in m EUR

- **FIFV & IFIE result sharply down q-o-q**, attributable mainly to:
 - Negative change in ‘ALM derivatives and other’ due mainly to hedge accounting ineffectiveness and negative impact of increased interest rates
 - Lower dealing room result due to market turbulence in March
 - Slightly more negative IFIE due to strong growth in insurance
 slightly offset by:
 - Less negative credit, funding and market value adjustments, mainly the result of increased KBC funding spreads and an increase of the yield curves (EUR, CZK and HUF), partly offset by increased counterparty credit spreads

- **Net other income**: higher than the normal run rate of 50m EUR per quarter due mainly to:
 - A 7m EUR contribution from the acquisition of Business Lease
 - A 29m EUR positive one-off in Hungary as a result of a legal case

Costs excluding bank & insurance taxes decreased q-o-q

OPERATING EXPENSES (INCLUDING COSTS DIRECTLY ATTRIBUTABLE TO INSURANCE)

in m EUR

- **Operating expenses excluding bank & insurance taxes:**
 - -1% q-o-q and +10% y-o-y (+9% y-o-y excluding FX effect)
 - -3% q-o-q and +7% y-o-y excl. acquisitions of 365.bank and Business Lease
 - The q-o-q decrease was due mainly to lower ICT costs, seasonally lower marketing & professional fee expenses and lower facility expenses, partly offset by higher staff costs (largely due to 23m EUR one-off profit bonus and the impact of the acquisitions) and higher depreciations
 - The y-o-y increase was due to, amongst others, higher staff costs (mainly the impact of wage inflation, one-off profit bonus and acquisitions), higher ICT costs, higher marketing costs, higher professional fee expenses and higher depreciations
- **Excluding FX and one-off profit bonus, the like-for-like operating expenses excluding bank & insurance taxes rose by 3.7% y-o-y, slightly higher than the guided organic +3.4% y-o-y due to timing differences. As such, our organic +3.4% y-o-y guidance is still valid**
- **1Q26 cost/income ratio**
 - 44% when excluding certain non-operating items* (46% in FY25)
 - 41% excluding all bank & insurance taxes (41% in FY25)

Total	549	499	50	58	58	58

- **1Q26 includes the bulk of the bank & insurance taxed for the full year, a 2% increase y-o-y**, driven mainly by:
 - +87m EUR in Hungary (o/w +81m y-o-y extra windfall tax from 53m EUR in 1Q25 to 134m EUR in 1Q26)
 - partly offset by:
 - -67m EUR in Belgium, as lower contribution to the Deposit Guarantee Scheme was partly offset by higher national taxes
 - -7m EUR in Bulgaria as a result of a lower contribution to the Deposit Guarantee Scheme
- Total **bank & insurance taxes** are expected to increase by 9% y-o-y to 724m EUR in 2026 (666m EUR in 2025)

- Impairments on financial assets at AC and FVOCI

- **Net loan loss impairment charges of 164m EUR in 1Q26** (compared with 73m EUR in 4Q25) due to:

 - Due to geopolitical turmoil, an ECL & management overlay (75m EUR) has been added to the ECL buffer. As this will lower the IRB shortfall within CET1 capital, this improved the fully loaded CET1 ratio by 4bps
 - Total outstanding ECL & management overlay for geopolitical & macroeconomic uncertainties now stands at 175m EUR

CREDIT COST RATIO EXCL. ECL & MANAGEMENT OVERLAY FOR GEOPOLITICAL AND MACROECONOMIC UNCERTAINTIES

in bps

IMPAIRED LOANS RATIO

in %

- **The impaired loans ratio amounted to 1.8%** (1.0% of which over 90 days past due)

KBC has only limited direct exposure to current geopolitical and financial turmoil

KBC's direct exposure to...

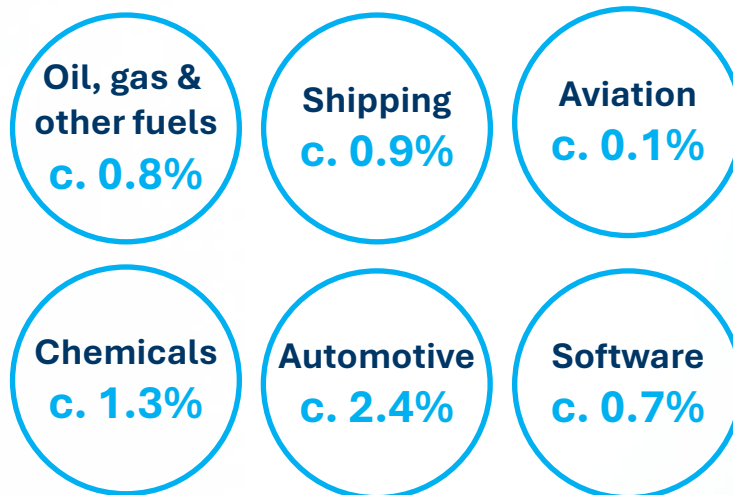

... the Middle East

Direct loan exposure to the Middle East (disregarding Turkey and Egypt) amounted to **0.2% of our total outstanding loan book** per end 1Q26

It is mostly related to **short term commercial trade finance**.

... vulnerable sectors

KBC's outstanding loan book is very well diversified, with limited exposure to the most vulnerable sectors

... Private credit and Private equity

Direct exposure to Private credit* was only **45m EUR per end 1Q26**, while Private equity** entailed less than 0.5% of outstanding loan exposure.

Moreover, **KBC's exposure to US regional banks and hedge funds is virtually 0**

* **Private credit funds** are defined as funds that have as main goal direct debt financing to firms.

** **Private equity funds** are investment firms that raise capital from a diverse group of institutional investors and high-net-worth individuals to acquire and actively manage non-public companies, aiming to enhance their value and achieve profitable exits through sales or public offerings. These investment companies may also hold other investments (e.g. (minority) stakes in stock-quoted companies, real estate, stakes in other funds).

Total loan portfolio outstanding | by IFRS9 ECL Stage*

- Drop of **Stage 3 ratio over the years** is driven mainly by the sale of the Irish loan portfolio
- The **increase of Stage 2 portfolio in 2022** resulted mainly from collective transfer to Stage 2 of Stage 1 portfolios, linked to the geopolitical and macroeconomic uncertainties (in line with strict application of the general ECB guidance on staging). In 2023, the declining trend of Stage 2 exposures was driven mainly by the partial release of the collective transfer back to Stage 1
- The **decrease of the Stage 2 ratio in 2024** is mainly caused by a revised staging methodology as from January 2024 (change from indicator based on 12 months probability of default to lifetime), a continuous update of staging for credits deemed vulnerable (to the geopolitical and macroeconomic uncertainties or indirectly exposed to military conflicts, such as the one in Ukraine) and for the remainder by a shift for KBC Commercial Finance exposure where the relative change in credit risk has been revisited based on the very low historical credit losses in this portfolio and the very short maturities

Cover ratios

Cover ratio | by IFRS9 ECL Stage*

in %

- The increasing trend of the **Stage 3 cover ratio** is driven mainly by additional provisions in Belgium, mostly related to lowering the backstop shortfall for (old) non-performing loans
- The decline of the **Stage 2 cover ratio** as of 2021, resulted mainly from collective shifts to Stage 2 (linked to Covid and the geopolitical & macroeconomic uncertainties) with on average better PD rating than the files already part of Stage 2.
As of 2024, driven by the revised staging methodology and the continuous update of the stage transfer for credits deemed vulnerable (to the geopolitical and macroeconomic uncertainties or indirectly exposed to military conflicts, such as the one in Ukraine) the Stage 2 cover ratio has gone up. This is explained by the fact that the files remaining in Stage 2 have on average higher PD ratings and therefore higher impairments

MREL targets

- The resolution plan for KBC is based on a **Single Point of Entry (SPE)** approach at KBC Group level, with **bail-in** as the preferred resolution tool
- In June 2025, the SRB communicated binding MREL targets** (under BRRD2) applicable as from 2Q25, expressed as a percentage of Risk Weighted Assets (RWA) and Leverage Ratio Exposure Amount (LRE)
- The **binding MREL targets (incl. CBR on top of the MREL target in % of RWA)** are:
 - 27.64% of RWA** (including transitional CBR* of 5.25%)
 - 7.42% of LRE**
- Combined Buffer Requirement** = Conservation Buffer (2.50%) + O-SII buffer (1.50%) + Countercyclical Buffer (1.16%) + Systemic Risk Buffer (0.09%)

MREL actuals

- The **MREL ratio in % of RWA** decreased from 31.4% in 4Q25 to 30.7% in 1Q26, driven mainly by increased RWA, partly offset by higher available MREL
- The **MREL ratio in % of LRE** increased q-o-q from 10.4% in 4Q25 to 10.5% in 1Q26 driven by the increase of the available MREL (chiefly due to higher CET1 capital and the issuance of a 1bn EUR new HoldCo Senior instrument, partly offset by the call of a 750m EUR HoldCo Senior instrument)

Commitment to the environment

2025 interim targets achieved

In 2025, the GHG intensity of the equity and corporate bond investment portfolio of KBC Insurance consolidated was 76% below the 2019 level, significantly exceeding the ambition of a reduction by 25%. Secondly, 51% of direct client money managed by KBC Asset Management was invested in Responsible Investment funds, surpassing our interim target of 45%.

12 climate targets for our lending portfolio

KBC’s Climate Dashboard shows that we are on track to meet our climate alignment benchmarks for 9 out of 12 targets. Progress on reaching the climate targets is monitored each quarter at the highest management levels, based on forecasting models, an evaluation of the volumes and, increasingly, also on the emission intensity of new loans granted.

ESG | Our commitment to the environment in 2025 (1)

Product development and service offering

- We want to contribute to environmental objectives and support our clients in their sustainability transitions through the products and services we offer.
- As such, **we support our clients with ‘green’ and ‘social’ loan products:**
 - Looking at it in a broad way, **11% of our total loan portfolio is classified as ‘green’ and 4% as ‘social’.**
 - Our 2025 Taxonomy Aligned percentage, our Green Asset Ratio (GAR) in 0.9%, compared to 0.5% in 2024.
 - The GAR under the new methodology (introduced by the Omnibus simplification package) would amount to 4.0% in 2025.
- Several parts of our lending portfolio contribute to environmental objectives. These are not aligned with EU Taxonomy criteria but do give an accurate picture of the trends in sustainable lending in our portfolio:

Our own environmental footprint

- We have been diligently **measuring our environmental footprint to better understand and mitigate our impact.** Since 2015, we have been calculating the GHG emissions arising from our own operations at group level, in accordance with the GHG Protocol Corporate Accounting and Reporting Standard. These calculations provide insight into and help identify the main sources of our direct impact on climate.
- Central to our strategy for our own environmental footprint is our **commitment** for reducing our negative impact while simultaneously enhancing our positive contributions:
 - We set **group-wide GHG reduction targets** in 2016 to reduce our negative environmental impact, and we have tightened them over the years;
 - We **amplify our positive contributions** as we aim, for instance, to make a significant positive difference through initiatives like recycling and circularity;
 - Since 2021, we have been **offsetting** own footprint emissions that cannot yet be eliminated. In this way, we aim to achieve net climate neutrality with respect to our own footprint target scope.
- In 2025, **100% of our purchased electricity came from renewable sources.**

REDUCTION IN OUR OWN GHG EMISSIONS

reduction compared to 2015

ESG | Our commitment to the environment in 2025 (2)

Our indirect environmental impact

Our commitment to sustainability goes beyond our direct operations. Our **Sustainable Finance Programme** is dedicated to addressing our indirect environmental impact, which encompasses the broader effects of our lending, investing and insurance activities.

- Related to our **lending activities**, we have:
 - been **estimating the financed emissions** of our entire lending portfolio since 2021. Since 2024, the calculations of the financed emissions of our loan portfolio have been verified through the assurance or our Sustainability Statement in the KBC Annual Report (adhering to CSRD);
 - Enhanced our **biodiversity impact and dependency analysis** by leveraging the updated ENCORE database and refining our calculation methodology;
 - Conducted a pilot review for counterparties involved in the **production of forest commodities**;
 - Set **intermediate climate targets for 2030 and long-term targets for 2050** for a subset of our White Paper (sub-)sectors. The scope of our existing climate targets currently covers about 63% of our total Scope 1 and 2 emissions.

- Related to our **investing activities**, we aim to **reduce the GHG intensity of our investment portfolios**. This is true for both the investments we make on behalf of our clients and our own investments.
- For our **insurance business**, we have again **calculated the alignment of our Non-Life insurance portfolio with the EU Taxonomy criteria for climate change adaptation**. Currently, 77 million euros of the gross written premium (GWP) complies with these stringent criteria (43 million euros in 2024).

Alignment indicators per scope and product line

- **Green:** KBC portfolio value is currently at or below the scenario-based benchmark.
- **Amber:** KBC portfolio value is currently maximum 5% higher than the scenario-based benchmark.
- **Red:** KBC portfolio value is currently more than 5% above the scenario-based benchmark.

For financial year 2025, a new target baseline was set for the two Real Estate KPIs to improve data and measurement quality. KBC cannot restate the 2024 value. However, the 2030 intermediate target has been set by keeping the reduction ambition from our initial target constant (up to 2050) but applied to the new baseline.

Cost/income ratio adjusted for specific items or C/I ratio when excluding certain non-operating items	The numerator and denominator are adjusted for (exceptional) items which distort the P&L during a particular period in order to provide a better insight into the underlying business trends. Adjustments include (i) MtM ALM derivatives (fully excluded), (ii) bank & insurance taxes (including contributions to European Single Resolution Fund) are included pro rata and hence spread over all quarters of the year instead of being recognised for the most part upfront (as required by IFRIC21) and (iii) one-off items

The risk reducing effect of collateral, guarantees or netting is not taken into account, except for repos and derivatives. This ratio supplements the risk-based requirements (CAD) with a simple, non-risk-based backstop measure
Liquidity coverage ratio (LCR)	[stock of high-quality liquid assets] / [total net cash outflow over the next 30 calendar days]
MREL	Minimum requirement for own funds and eligible liabilities
